

Restaurant Rating System

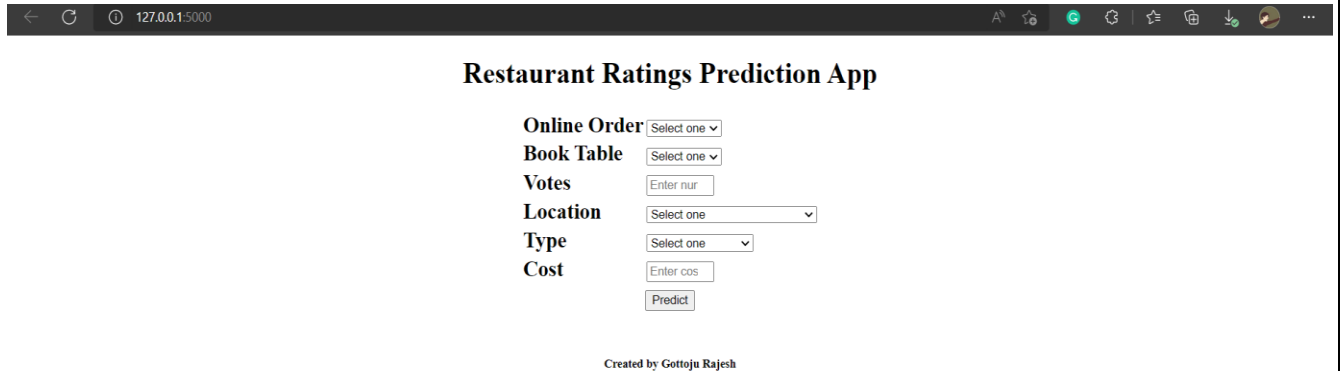

Wireframe Documentation

Gottoju Rajesh

Home Page

We have divided Restaurant Rating system into Two Sections: -

1. First thing anyone will see is a pop-up window on Homepage which will ask for User Inputs like what are the facilities provided by the restaurants and what is the location of the restaurants.

The screenshot shows a web browser window with the address bar displaying '127.0.0.1:5000'. The page title is 'Restaurant Ratings Prediction App'. The form contains the following fields:

- Online Order**: Select one (dropdown menu)
- Book Table**: Select one (dropdown menu)
- Votes**: Enter nur (text input)
- Location**: Select one (dropdown menu)
- Type**: Select one (dropdown menu)
- Cost**: Enter cos (text input)

Below the form is a 'Predict' button. At the bottom of the page, it says 'Created by Gottoju Rajesh'.

2. The User will encounter with another pop-up window showing the predicted result.

Restaurant Ratings Prediction App

The form is identical to the one in the first screenshot, with the following fields:

- Online Order**: Select one (dropdown menu)
- Book Table**: Select one (dropdown menu)
- Votes**: Enter nur (text input)
- Location**: Select one (dropdown menu)
- Type**: Select one (dropdown menu)
- Cost**: Enter cos (text input)

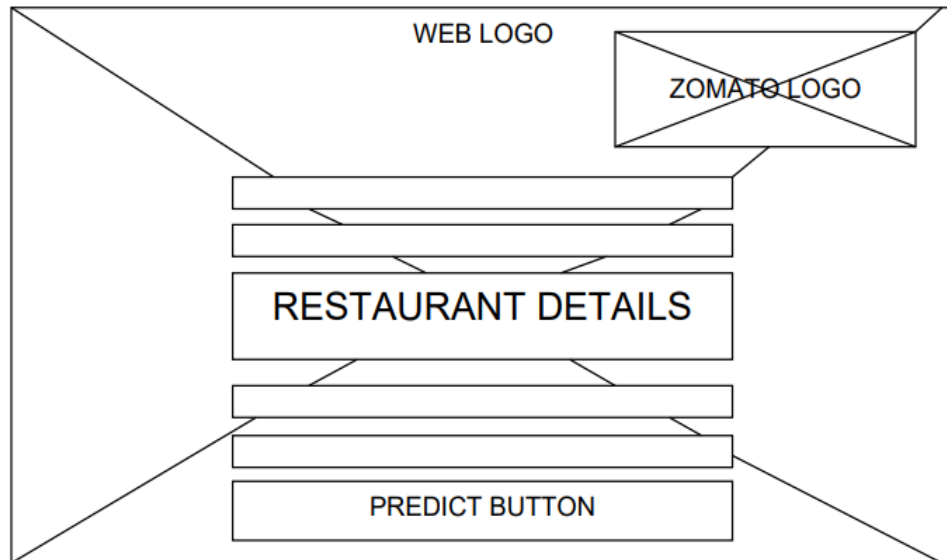

Below the form is a 'Predict' button.

Your Rating is: 4.0

AboutPage

Based on User's input, our Restaurant Rating System will show the predicted result on the next pop up. A sample view of Homepage showing results is below:

The **Crossed Sections** in above sample can be used for images of food as background to give user a good experience. Predicted result will show when all the details are filled and user hit the predict button at the bottom.
